Existing Pavement Conditions
Analysis Results

Glossary of Terms for Data Format

Street Name - Street Name prefixed with the Municipality's three digit code.

* Indicates the road section is eligible to receive Federal Aid for Reconstruction.

Section From - Start point of the individual section.

Section To - End point of the individual section.

Length (ft) - The length of the section, measured in feet.

PCI - Pavement Condition Index 95 - 100 indicates the pavement is in **excellent** condition,

85 - 94 indicates the pavement is in **good** condition;

65 - 84 indicates the pavement is in **fair** condition;

0 - 64 indicates the pavement is in **poor** condition.

Repair Code -

1. Reconstruction; (\$30 sq/yd)
2. Rehabilitation; (\$10 sq/yd)
3. Preventative Maintenance; (\$7.50 sq/yd)
4. Routine Maintenance; (\$2.50 sq/yd)
5. No Immediate Maintenance. (\$0 sq/yd)

PMS Ranking - A ranking of all the sections requiring repair, based on a cost/benefit produced by the RoadManager software through the Benefit Value. The section with the highest Benefit Value has received a PMS Ranking of 1. Sections with equal Benefit Values have received the same ranking. In total there are 146 ranked sections.

Estimated ADT - Average Daily Traffic traveling on each section of road. Generally, traffic count data was available on the higher volume roads. Where data was not available, estimates were made based on the functionality of the road and the number of houses or businesses they served.

Survey Date - Date on which the pavement distress data were collected.

NOTE:

The information contained in these tables was created from a visual evaluation of the pavement surface in which the severity and extent of the observed distresses were estimated. The recommended repair strategies and the associated costs are not final. A more detailed engineering evaluation must be conducted before finalizing any repairs and their associated costs. The information presented here can be used as a tool for preliminary evaluation and prioritization of the paved road network as a whole.
